Art Unit: 2833

1. Claim 1 is objected to because on line 14 it appears that ~~-is-~~ should be inserted after **portion (70)**. Appropriate correction is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Nochese.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The connectors of Morgan and Watanabe, et al. are further examples of similar connectors having a lock on a shorter outer surface and guides on the longer surfaces. Inoue, et al. also shows a lock and guides on adjacent surfaces.

5. Claims 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
